Data Analyst — Business Intelligence & Data Science

Double-degree engineer — Mines Saint-Étienne × Institut Polytechnique de Paris (MSc Data Science)

French native | **English** C1, TOEIC 955/990 | **Spanish** B1/B2

EDUCATION

Institut Polytechnique de Paris — MSc in Data Science (2nd year) Sep. 2024 – Aug. 2025
Courses taught at École Polytechnique, ENSAE and Télécom Paris Palaiseau, France

- Statistical modelling, regression, time series, machine learning, big data frameworks

École Nationale Supérieure des Mines de Saint-Étienne — *Diplôme d'ingénieur* Sep. 2022 – Aug. 2025
Master of Engineering Saint-Étienne, France

- Statistics, probability, numerical methods, operations research, computer science, data science and AI

Lycée Montaigne — *Classes préparatoires*, advanced mathematics and physics Sep. 2019 – July 2022

PROFESSIONAL EXPERIENCE

Final-Year Internship — Data & Analytics Consultant Mar. 2025 – Sep. 2025
BDO France Paris, France

- Collected, cleaned and analysed heterogeneous datasets from multiple sources (Python, advanced Excel) for sector studies; machine learning (clustering, random forest, gradient boosting, anomaly detection).
- Structured a consolidated database (7,399 entities × 86 variables, 5+ sources); turned raw data into KPIs and recommendations for clients and management. Details: [Portfolio](#).

Research Internship in Data Science June 2024 – Aug. 2024
Kumamoto University Kumamoto, Japan

- Preprocessed and analysed sensor time series, forming and testing hypotheses against the data.
- Built Power BI and Python dashboards; managed the collection pipeline across sensors, Raspberry Pi and lab server. See [Portfolio](#).

PERSONAL PROJECTS

Quantitative Research on Prediction Markets — Python, SQLite, Pandas 2026

- Built an end-to-end pipeline collecting 5.5M real trades across 8,500+ resolved markets from REST and WebSocket APIs into SQLite.
- Defined metrics, ran out-of-sample validation and tested for bias; invalidated five candidate strategies with evidence.
- Showed that an apparent edge was a statistical artefact, not a genuine signal. [Portfolio](#).

Orbit — Personal Analytics Dashboard — Python, FastAPI, JavaScript 2026

- Built a FastAPI backend serving browser dashboards with live KPIs from several REST/WebSocket APIs, deployed on a Linux cloud server.
- Integrated a local LLM (Ollama) for automated content summarisation, running fully on-device. Screenshots: [Portfolio](#).

TECHNICAL SKILLS

Analysis: Python (Pandas, NumPy, Scikit-Learn), R, SQL | **BI & Data Viz:** Power BI, Kibana, advanced Excel
Methods: statistics, time series, machine learning, ETL, KPIs | **Tools:** Git, L^AT_EX

INTERESTS

Judo (9 years), climbing, weight training, cycling, piano | Travel: Japan, Spain, Portugal, Germany, Morocco
